

Marine Fighter Attack Squadron 122 Command Philosophy

Commander's Vision: VMFA-122 is a dependable, innovative, high-performing squadron. We reinforce mission success by **uplifting** the Marines and Sailors to our left and right, **caring** for our families, and tough, **realistic combat preparation**. Together, we also fly, fix, and fight the Marine Corps' most advanced fighter aircraft.

Method: We will leverage our ability to conduct detailed planning and approach our tasks as the professionals we are. Our methodical approach to operations will increase individual performance while providing stability to our personnel and their families. Safety will always underpin our plan of execution and we will operate on the basis of achieving **Brilliance in the Basics**. My intent will only be achieved through the hard work and dedication from every Marine and Sailor attached to the Werewolves. I charge each and every one of us to make sure **WE** are taking care of the Marine or Sailor to the left and right and ensuring that our squadron and families are well-informed and well-supported both on and off duty.

End State: VMFA-122 **WILL** be:

Relevant – To Marine Aviation and the Joint Force

Ready – Physically, Mentally, and Administratively

Responsive – To support the MAGTF Commander

Accountable – We will not lie, cheat, or steal to execute our mission

Closing Comments: It is a privilege for me to join a unit filled with such a rich and illustrious history in Marine Aviation. I am humbled and honored to serve as **YOUR** Commanding Officer. Be assured that I am dedicated to upholding the Esprit de Corps and traditions of VMFA-122. This commitment accompanied by your attention to detail, your professionalism, and compassion for your fellow Marines, Sailors and their families, will ensure **OUR** continued success during the months and years to come.

MACH ALTUS

M. N. Golike
Commanding Officer

VMFA - 122
