

Squadron Safety Policy

**Marine Wing Support Squadron 373
Marine Air Control Group 38**

We belong to an elite warfighting organization with a distinguished history and important role in the defense of our country. The execution of our mission is inherently dangerous in every phase and we will train to prepare for combat. We will accomplish our missions safely and effectively, while incorporating and assessing risk at every level.

Standards, regulations, and policies: Safety is clearly defined in publications and we will adhere to them. Any deviation from published standards, orders, or policies can result in serious injury or death.

Risk Management: associated risks must be identified, controlled, and mitigated in training and combat as well as liberty periods. Personnel at every level must understand associated risks in every task.

Eliminate Complacency: Complacent attitudes will erode safety and increase risk. Whether it is the first time or hundredth time conducting a task, we will not be complacent with safety.

These lines of effort apply on and off duty, in garrison and combat, in training, and on liberty. I expect all Marines and Sailors to ensure safety in all aspects and report violations of safety policy. Safe practices, attitudes, and risk management are hallmarks of a professional warfighting organization.

DAVID L. TRAN
Lieutenant Colonel, U.S. Marine Corps
Commanding Officer
Marine Wing Support Squadron 373
